I am sending this for a family member who has no access to e-mail.

November 18, 2003

To Whom It May Concern:

On 7/21/02 I had part of my left lung removed due to Asbestosis. I have been a lifelong resident of Michigan and have always been proud of our great state. I feel very untrusted due to proposed act, court rule #2003-47. After all these years of working, now having this Asbestosis lung disease, I am unable to provide for myself and my family and am in constant pain from my condition. This proposed change in court rule leaves me feeling that my rights are being violated. I thought our state was for the working class and would help and understand. As we grow older our commitment to the building and future of this state should grow. The real crisis in our state is the failure of corporations to take responsibility for their bad actions. We, the working class people, are the victims of corporate misconduct due to certain Republican judges that rule my life and family.

I, as well as my family, have supported the Republican party for years and would like to continue to do so.

Thank you very much for your time. I would appreciate a reply.
